

Thank you for visiting our website to learn more about our exciting strategic alliance with Siemens, a leader in imaging equipment. There are three main benefits to our alliance:

- **Increases Patient Access to the CyberKnife System**
The alliance provides Accuray a larger footprint in radiation oncology, thereby making CyberKnife available more widely to patients. The agreement will allow Siemens to offer its customers a broader product portfolio.
- **Improves Patient Care**
Certain of Accuray's technology solutions will be incorporated into Siemens' linear accelerator products for radiation therapy, to improve patient care.
- **Advances Research & Development**
Accuray and Siemens will create a research-and-development relationship designed to keep Accuray on the forefront of innovation and to develop next-generation technologies. Over the long term, we expect our R&D alliance with Siemens to create exciting growth opportunities for Accuray. We believe that the combination of radiation treatment and advanced imaging will make a significant contribution to the future of cancer care.

Accuray continues to maintain our focus on delivering innovative, life-saving cancer treatment options to our patients, and we are excited about the benefits and enhanced opportunities this relationship offers.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Euan Thomson'.

Euan S. Thomson, Ph.D.
President and Chief Executive Officer
Accuray Incorporated
